Oh January *Richard E. Miller Nicolette Hahn Niman Daniela Carpi Harvey Ussery Dr. Caroline Leaf Mohammad Aslam Khan H. Roy Kaplan Joel David Hamkins Paul D. Collins Gianluca Giansante Andrew Furman Princess Chelsea*

in preparation for this book and to better understand our screen based digital world miller only accessed information online for seven years on the end of privacy explores how literacy is transformed by online technology that lets us instantly publish anything that we can see or hear miller examines the 2010 suicide of tyler clementi a young college student who jumped off the george washington bridge after he discovered that his roommate spied on him via webcam with access to the text messages tweets and chatroom posts of those directly involved in this tragedy miller asks why did no one intervene to stop the spying searching for an answer to that question leads miller to online porn sites the invention of facebook the court martial of chelsea manning the contents of hillary clinton

s email server anthony weiner s sexted images chatroulette and more as he maps out the changing norms governing privacy in the digital age

for decades it has been nearly universal dogma among environmentalists and health advocates that cattle and beef are public enemy number one but is the matter really so clear cut hardly argues environmental lawyer turned rancher nicollette hahn niman in her new book defending beef the public has long been led to believe that livestock especially cattle erode soils pollute air and water damage riparian areas and decimate wildlife populations in defending beef hahn niman argues that cattle are not inherently bad for either the earth or our own nutritional health in fact properly managed livestock play an essential role in maintaining grassland ecosystems by functioning as surrogates for herds of wild ruminants that once covered the globe hahn niman argues that dispersed grass fed small scale farms can and should become the basis for american food production replacing the factory farms that harm animals and the environment the author a longtime vegetarian goes on to dispel popular myths about how eating beef is bad for our bodies she methodically evaluates health claims made against beef demonstrating that such claims have proven false she shows how foods from cattle milk and meat particularly when raised entirely on grass are healthful extremely nutritious and an irreplaceable part of the world s food system grounded in empirical scientific data and with living examples from around the world defending beef builds a comprehensive argument that cattle can help to build carbon sequestering soils to mitigate climate change enhance biodiversity help prevent desertification and provide invaluable nutrition defending beef is simultaneously a book about big ideas and the author s own personal tale she starts out as a skeptical vegetarian and eventually becomes an enthusiastic participant in environmentally sustainable ranching while no single book can definitively answer the thorny question of how to feed the earth s growing population defending beef makes the case that whatever the world s future food system looks like cattle and beef can and must be part of the solution

every culture knows the phenomenon of monsters terrifying creatures that represent complete alterity and challenge every basic notion of self and identity within a cultural paradigm in latin and greek culture the monster was created as a marvel appearing as

something which like transgression itself did not belong to the assumed natural order of things therefore it could only be created by a divinity responsible for its creation composition goals and stability but it was triggered by some in or non human action performed by humans the identification of something as monstrous denotes its place outside and beyond social norms and values the monster evoking transgression is most often indistinguishable from reactions to the experience of otherness merging the limits of humanity with the limits of a given culture the topic entails a large intersection among the cultural domains of law literature philosophy anthropology and technology monstrosity has indeed become a necessary condition of our existence in the 21st century it serves as a representation of change itself in the process of analysis there are three theoretical approaches psychoanalytical representational ontological the volume therefore aims at examining the concept of monstrosity from three main perspectives technophobic xenophobic superdiversity today s globalized world is shaped in the unprecedented phenomenon of international migration the resistance to this phenomenon causes the demonization of the other seen as the antagonist and the monster the monster becomes therefore the ethnic other the alien to reach this new perspective on monstrosity we must start by examining the many facets of monstrosity also diachronically from the philological origin of the term to the roman and classical viewpoint from the renaissance medical perspective to the religious background from the new filmic exploitations in the 20th and 21st centuries to the very recent ethnological and anthropological points of view to the latest technological perspective dealing with artificial intelligence

the most comprehensive guide to date on raising all natural poultry for the small scale farmer homesteader and professional grower the small scale poultry flock offers a practical and integrative model for working with chickens and other domestic fowl based entirely on natural systems readers will find information on growing and sourcing feed on a small scale brooding and breeding at home and using poultry as insect and weed managers in the garden and orchard ussery s model presents an entirely sustainable system that can be adapted and utilized in a variety of scales and will prove invaluable for beginner homesteaders growers looking to incorporate poultry into their farm or poultry farmers seeking to close their loop ussery offers extensive information on the definition of an integrated poultry flock imitation of natural systems integrating patterns and closing the circle everything you need to know about your basic chicken including distinctive points about anatomy and behavior that are critical to management extended

information on poultry health and holistic health care with a focus on prevention planning your flock flock size choosing breeds fowl useful for egg vs meat production sourcing stock how to breed and brood the flock including breeding for genetic conservation including the most complete guide to working with broody hens available anywhere making and mixing your own feed with tips on equipment storage basic ingredients technique grinding and mixing providing more of the flock's feed from sources grown or self foraged on the homestead or farm including production of live protein feeds using earthworms and soldier grubs using poultry to increase soil fertility control crop damaging insects and to make compost including systems for pasturing and for tillage of cover crops and weeds recipes for great egg and poultry dishes including ussery's famous chicken stock and one of the best step by step poultry butchering guides available complete with extensive illustrative photos no other book on raising poultry takes an entirely whole systems approach or discusses producing homegrown feed and breeding in such detail this is a truly invaluable guide that will lead farmers and homesteaders into a new world of self reliance and enjoyment

science is beginning to understand that our thinking has a deep and complicated relationship with our eating our thoughts before during and after eating profoundly impact our food choices our digestive health our brain health and more yet most of us give very little thought to our food beyond taste and basic nutritional content in this revolutionary book dr caroline leaf packs an incredible amount of information that will change readers eating and thinking habits for the better rather than getting caught up in whether we should go raw or vegan gluten free or paleo leaf shows readers that every individual is unique has unique nutritional needs and has the power to impact their own health through the right thinking there's no one perfect solution rather she shows us how to change the way we think about food and put ourselves on the path towards health anyone who is tired of traditional diet plans that don't work who struggles with emotional eating or who simply isn't satisfied with their level of health will find in this book the key to discovering how they can begin developing a healthier body brain and spirit

this book focuses on the emergence of covid 19 and climate change as twin mega risks to cities of both developed and developing countries the work analyses how the pandemic has transformed city functions promoted remote working and affected socializing

education and learning patterns recreation as well as shopping and entertainment it discusses the lessons learned from these two mega risks the evolution of urban patterns and functions in their wake and provides visionary thinking for the improvement of cities from the experiences gained the covid 19 pandemic and climate change are both posing serious threats to cities future together they demand changes in the ways cities function and operate the work presents a case for a better understanding of the twin mega risks the magnitude of their impacts the responses of cities in combating these issues and planning strategies for preparing mitigating and adapting to these and future risks the book is designed to provide reliable resource materials for a wide audience such as planners professional practitioners scientists students teachers and researchers working in various fields including geography environmental sciences social sciences policy and planning

since the earliest days of america racist imagery has been used to create harmful stereotypes of the indigenous people in this book the conflict between invading european white settlers and the indigenous groups who occupied the land that became the united states is described through the context of race and racism using depictions from art literature radio cinema and television the origin and persistence of such stereotypes are explained and their debilitating effects on the well being of indians are presented this text also explores their accomplishments in attempts to maintain their sovereignty dignity and respect

an introduction to the philosophy of mathematics grounded in mathematics and motivated by mathematical inquiry and practice in this book joel david hamkins offers an introduction to the philosophy of mathematics that is grounded in mathematics and motivated by mathematical inquiry and practice he treats philosophical issues as they arise organically in mathematics discussing such topics as platonism realism logicism structuralism formalism infinity and intuitionism in mathematical contexts he organizes the book by mathematical themes numbers rigor geometry proof computability incompleteness and set theory that give rise again and again to philosophical considerations

the gnostic revival of the enlightenment witnessed the erection of what could be called the kantian rift an epistemological barrier

between external reality and the mind of the percipient arbitrarily proclaimed by german philosopher immanuel kant this barrier rendered the world as a terra incognita suddenly the world out there was deemed imperceptible and unknowable in addition to the outer world the cherished metaphysical certainties of antiquity the soul a transcendent order and god swiftly evaporated the way was paved for a new set of modern mythmakers who would populate the world out there with their own surrogates for the divine collectively these surrogates could be referred to as the beyond because they epistemologically and ontologically overwhelm humanity in recent years the beyond has been invoked by theoreticians literary figures intelligence circles and deep state operatives who share some variant of a technocratic vision for the world in turn these mythmakers have either directly or indirectly served elitist interests that have been working toward the establishment of a global government and the creation of a new man their hegemony has been legitimized through the invocation of a wrathful earth goddess a technological singularity a superweapon and extraterrestrial gods all of these are merely masks for the same counterfeit divinity the beyond

this book provides research findings and practical information on online communication strategies in politics based on communication research and real world political campaign experience the author examines how to use the and social media to create public visibility build trust and consensus and boost political participation it offers a useful guide for practitioners working in the political arena as well as for those managing communication projects in institutions or companies

through stories of nature near at hand andrew furman explores touchpoints between his everyday suburban life and the environment in south florida contemplating his place in a subtropical landscape stretching from the everglades to the atlantic coast
