introducing the topics themes and arguments of the most influential hindu and buddhist indian philosophers an introduction to indian philosophy leads the reader through the main schools of indian thought from the origins of buddhism to the saiva philosophies of kashmir by covering buddhist philosophies before the brahmanical schools this engaging introduction shows how philosophers from the brahmanical schools including samkhya yoga nyaya vaisheshika and mimamsa as well as vedanta were to some extent responding to buddhist viewpoints together with clear translations of primary texts this fully updated edition features a glossary of sanskrit terms a guide to pronunciation chronological list of philosophers works with study tools and constant reference to original texts an introduction to indian philosophy provides students with deeper understanding of the foundations of indian philosophy

this textbook helped to define the field of behavioural ecology in this fourth edition the text has been completely revised with new chapters and many new illustrations and full colour photographs the theme once again is the influence of natural selection on behaviour an animal's struggle to survive and reproduce by exploiting and competing for resources avoiding predators selecting mates and caring for offspring and how animal societies reflect both cooperation and conflict among individuals stuart a west has joined as a co author bringing his own perspectives and work on microbial systems into the book written in the same engaging and lucid style as the previous editions the authors explain the latest theoretical ideas using examples from micro organisms invertebrates and vertebrates there are boxed sections for some topics and marginal notes help guide the reader the book is essential reading for students of behavioural ecology animal behaviour and evolutionary biology key features long awaited new edition of a field defining textbook new chapters illustrations and colour photographs new co author focuses on the influence of natural selection on behavior and how animal societies reflect both cooperation and conflict among individuals the long awaited update to a classic in this field is now here presenting new directions in thinking and addressing burning questions richly informed by progress in many other disciplines such as sensory physiology genetics and evolutionary theory it marks the emergence of behavioural ecology as a fully fledged discipline this is a marvellous book written in a lucid style a must read for those in the field it is also a cornucopia of new

thinking for anyone interested in evolution and behaviour manfred milinski nature 2012

a book on legal philosophy necessarily focuses attention on law in addition to this focus an introduction to an african legal philosophy focuses attention on philosophy the link between law and philosophy is brought into relief which is done through an african context an attempt is made to spell out what is african about legal philosophy without being cut off of african legal philosophy from non african legal philosophy the book draws attention to the view that a basic component of african legal philosophy consists of an investigation of what it is to be an african and because an african is a human being among other human beings the investigation is about what it is to be a human being ubuntuism is an african derived word that captures this mode of being human moreover because human beings are cultural beings african cultural context guides the investigation inescapably it is claimed that every legal philosophy is embedded in a culture african legal philosophy is not an exception it is deeply rooted in african culture a culture that is today shaped in part by a european colonialist culture one feature that will strike one as one reads the book is that the book approaches african legal philosophy as a means of decolonization of african culture african legal philosophy can accomplish this intelligently and effectively if it is itself decolonized in doing this it contrasts sharply with mainstream western legal philosophy

this book comprises an introduction to information as an external commodity a data base that can be manipulated retrieved transmitted and used it is useful at an introductory undergraduate level and also for anyone who is new to the field of information science

pergamon series of monographs on furniture and timber volume 10 an introduction to timber engineering presents in readable form an understanding of timber engineering which covers important aspects of the building industry particularly in the field of prefabrication the chapters of this book present a good understanding of the many integrated divisions of the industry involved in timber engineering the examples provided on design indicate the method of adapting normal structural analysis for use with timber and joint forms most of the information specified in this volume are british practices but reference to other european and north american developments are also included to provide a fuller understanding of the industry as a whole and need for local variations to suit climatic conditions and raw material supplies some of the topics discussed include the timber engineering developments in europe and north america timber as a structural material structural timber forms mechanical joints design of columns and struts and preservation of timber from decay this publication is a useful reference to building and engineering students

dag norberg s analysis and interpretation of medieval latin versification which was published in french in 1958 and remains the standard work on the subject appears here for the first time in english with a detailed scholarly introduction by jan ziolkowski that reviews the developments of the past fifty years
